

How to...

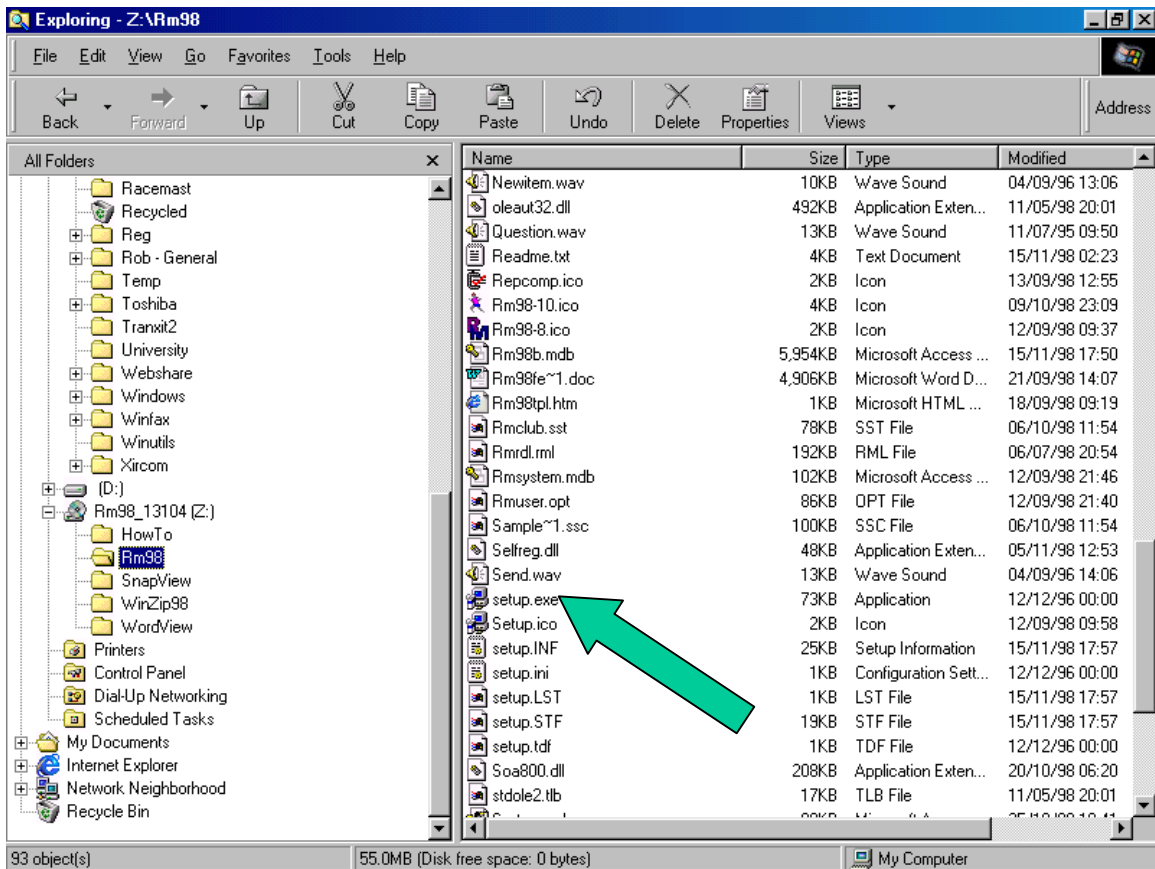

Install a new Version of RaceMaster98

NOTE: If you're installing RaceMaster98 for the first time, follow the instructions below. However, if you are about to install a newer version you will need to uninstall the old version first. To do this, please follow the "How to...Uninstall RaceMaster98" instructions.

1. Place the RaceMaster98 CD-ROM into your computer.
2. Click on "Start", highlight "Programs" and then click on "Windows Explorer".

- Now double-click on the RM98_xxxxx (RaceMaster98 CD label) then click on the RM98 folder. On the right-hand side of the screen, scroll down until you can see two files called "Setup". Double click on the first of these files.

- Now follow the instructions as they appear on the screen (choose "typical" installation).
